

The silence
the expectation
the excitement

” The great feeling
of bringing home your
own game and filling
the pantry with locally
sourced, organic meat.

The feeling of being in the
now and at one
with nature.

Better Hunting

Triton

shooting unlimited

Regardless of what drives you to hunt, there are some great benefits to using a silencer on your rifle:

- ➔ Noise reduction - Protects everyone's ears, including the dog.
- ➔ Recoil reduction - Safer shooting
- ➔ Reduced barrel rise - Faster second shot
- ➔ Reduces / eliminates muzzle flame - Maintains night vision during evening hunting
- ➔ Reducing distance noise - Less disturbance to surrounding areas

Triton

Shooting Unlimited

All Triton silencers share our unique SHOOTING UNLIMITED feature, enabling you to use the silencer intensively, for long periods without fear of damage from overheating.

- ➔ Stainless Steel interior
- ➔ Will withstand intensive periods of use
- ➔ 5 year warranty
- ➔ Neoprene cover included

Rimfire II is a compact, muzzle-mounted, silencer designed to be used with any Rimfire cartridge on the market. Rimfire II is available in .17 and .22 calibres. Rimfire rounds are notoriously dirty and it is critical to have a silencer that not only performs, but is also very easy to maintain. A unique feature of the Rimfire II silencer is the “monocore” design which makes cleaning extremely easy. Rimfire II cal. 22 provides excellent sound reduction on all .22 calibres. When firing with a .22 LR Subsonic round, the sound is reduced to levels where you can virtually only hear the mechanism of the rifle. Rimfire II cal. 17 takes down the nasty crack from a .17 HMR to a level which your ears are going to love!

Triton No. 3 – Small caliber Front-mounted silencer designed for small-calibre rifles between 5.7mm (.222) and 6.7mm (.260). With its small diameter and low weight, you will hardly notice this silencer when mounted on your rifle. Neoprene cover included. Triton No. 3 is optimized for .223 calibre but is also very effective on cals .243 and 6XC.

Triton No. 4 – Active Hunter is the silencer for the active hunter on the move who demands a compact size combined with impressive performance. With its compact size and low weight this is a perfect silencer also if you are shooting with low-magnification or non-magnifying optics - for example a red dot sight. Triton No. 4 is perfect for use in driven hunts especially if you are a dog handler. Neoprene cover included. Triton No. 4 is optimized for .308 and 6.5x55 calibres but is also really effective on 30-06.

Triton No. 5 – Hunting Performance is the flagship of the Triton Numbers program and is a true all-round silencer that delivers top noise and recoil reduction. This is the silencer for shooters who love different types of hunting - both on the move and from standing, and expect the best in terms of performance and versatility. Neoprene cover included. Triton No. 5 is optimized for calibre .308 and 30.06 but is also really effective on more powerful calibres such as 300 Win Mag.

Triton No. 6 – Ultra Performance is the most effective silencer in the Triton Numbers program and delivers ultra-effective performance even with really powerful calibres. With the same, moderate, addition to the barrel length as Triton No. 5, Triton No. 6 is the call / high seat hunter's favourite. Neoprene cover included. Triton No. 6 is optimized for .300 Win Mag calibre but is also very effective on .308, 30.06 and all Magnum calibres.
